

ABHISHEK KALME

Full Stack Engineer | React, Next.js, Node.js, TypeScript

☎ +91-9098696691 ✉ abhishekkalme0@gmail.com linkedin.com/in/abhishek-kalme github.com/abhishekkalme abhishek-portfolio25.vercel.app/

Professional Summary

- Full Stack Engineer with hands-on experience building scalable web applications using **React, Next.js, Node.js, TypeScript, MongoDB, and AWS**.
- Experienced in developing feature-rich applications with **secure authentication systems, third-party API integrations, vector databases, and cloud deployments** on Vercel and AWS.
- Built production-ready full-stack applications with **semantic search, CI/CD pipelines, Redis caching, and Docker containerization** using modern engineering practices including GitHub Actions.

Work Experience

Full-Stack Developer (Independent Projects)

Jan 2024 – Present

Self-Directed

Remote

- Designed and built **5+ full-stack web applications** using the MERN stack, covering authentication, payments, real-time features, and AI integrations, each deployed and publicly accessible.
- Improved **API response time by up to 40%** through Redis caching and query optimization on the Rate Limiter project; cut deployment steps via Docker and Vercel CI/CD pipelines.
- Implemented **JWT-based authentication and RBAC** across multiple projects to enforce role-based route protection and prevent unauthorized access.

Open Source Developer – GSSoC

May 2025 – Aug 2025

GirlScript Summer of Code

Remote

- Contributed **10+ pull requests** across **5 open-source repositories**, fixing bugs and improving code quality.

Projects

Learnify — LMS | [Source Code](#) | [Live Demo](#)

MERN Stack | **Cloudinary** | **JWT** | **Gemini AI**

- Architected a **production-ready, full-stack LMS** on Vercel with **React 18 + Vite** and **Node.js/Express.js**, featuring a **multi-layer auth system** (JWT, Google OAuth 2.0, email OTP), API rate limiting, and Helmet security headers.
- Integrated **Cloudinary SDK** for secure PDF uploads with in-browser preview, engineered **RBAC** for Admin/Teacher/Student roles with a content approval workflow, and built an embedded **AI chatbot** (Google Gemini) for real-time academic Q&A.
- Managed global client state using **React Context API** with modular providers, building **reusable component libraries** (form inputs, modals, loaders) for consistent UI patterns across the application.
- Designed **20+ MongoDB/Mongoose schemas** powering 15+ features including study tools (Pomodoro, flashcards, quiz, GPA calculator), discussion forum, GitHub/LeetCode portfolio integration, and a leaderboard gamification system.

Rate Limiter | [Source Code](#) | [Live Demo](#)

TS | **Node.js** | **Express.js** | **Redis** | **Docker** | **Prometheus/Grafana** | **Nginx**

- Architected a **distributed rate limiting system** in **TypeScript** implementing **4 algorithms** (Token Bucket, Leaky Bucket, Sliding Window Log, Sliding Window Counter) via the **Strategy Pattern**, with **atomic Lua scripts** for race-condition-free Redis operations, **tiered throttling** (IP/user/endpoint), and automatic in-memory fallback.
- Orchestrated **6 Docker Compose services** (3 app instances, Redis, Nginx load balancer, Prometheus, Grafana) with a **multi-stage build**, configured **Prometheus metrics** and a **Grafana dashboard** for real-time observability, and wrote **17 automated tests** (Vitest/Supertest) with 80% coverage thresholds.

Movie Explorer App - CineVerse | [Source Code](#) | [Live Demo](#)

Next.js | **TS** | **Tailwind CSS** | **Supabase** | **TMDB API**

- Built a responsive **movie, TV, and anime discovery platform** with a dynamic hero carousel, multi-filter search, and platform-based browsing via **TMDB API**; integrated **Supabase** for email/Google OAuth and guest authentication with PostgreSQL-backed user libraries and cross-device sync.
- Engineered **streaming aggregation** with 16 embedded third-party servers and auto-fallback, episode guides, and guest view limits; optimized via a **server-side TMDB proxy** with rate limiting and stale-while-revalidate caching for fast responses.
- Architected a **shared component library** with reusable primitives (GhostBtn, MovieCard, SectionLabel) and **React Context API** for global state management (auth, library, notifications, popups); added **Framer Motion** page transitions and toast notifications for a polished cinematic UI.

MindCare — Wellness Platform | [Source Code](#) | [Live Demo](#)

Next.js | **TypeScript** | **MongoDB** | **Auth.js** | **Node.js** | **Docker**

- Built a **full-stack wellness platform** with **10+ integrated features** including mood tracking, journaling, habit building, sound therapy, and a real-time conversational interface backed by **third-party API orchestration** and context-aware session management.
- Implemented **RBAC** (user/therapist/admin) with **Auth.js v5 OAuth**, **Razorpay** payment integration for therapist booking, **Docker** containerization, and **Redis-backed** rate limiting with **XOR-cipher encryption** for user privacy.
- Engineered a **multi-provider LLM orchestration layer** with automatic failover across **4 AI providers** (Groq, Gemini, OpenRouter, Ollama) and **vector DB memory** (Pinecone/Qdrant) for context-aware conversation continuity.

Achievements

Agentic AI Hackathon 2026 <i>Powered by Microsoft</i>	2026
Participated in the Agentic AI Hackathon 2026, powered by Microsoft and organized by Team SheKunj, building a Mental Wellness Support Agent – an AI-powered conversational agent with multi-provider LLM orchestration (Groq, Gemini, OpenRouter), crisis detection, mood tracking, and context-aware memory using Pinecone vector DB for personalized emotional support.	
Smart India Hackathon (SIH) 2025 – Internal Hackathon	2025
Ranked 5th among 50+ competing teams in Smart India Hackathon 2025 by building a career guidance platform using React, Node.js, MongoDB, and recommendation algorithms.	
Certifications	2025
Postman API Fundamentals Student Expert (verify) – Jul 2025 Deloitte Technology Job Simulation – Jul 2025 Accenture Software Engineering Job Simulation – Aug 2025 Complete Web Development (Udemy, Hitesh Choudhary) – Aug 2025	

Technical Skills

Languages: C++, JavaScript (ES6+), TypeScript, SQL
Backend: Node.js, Express.js, REST APIs, JWT, OAuth 2.0, Redis, Rate Limiting, RBAC
Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, Redux Toolkit, React Router, Framer Motion
Databases: MongoDB, MySQL, Redis Testing: Jest, Vitest, Postman API Testing
DevOps & Tools: AWS (EC2, S3, IAM, Lambda), Docker, GitHub Actions (CI/CD), Git, Postman, Vercel, Cloudinary, Vite
Concepts: Agile, CI/CD, RESTful Architecture, MVC, Microservices, System Design, API Optimization

Education

Jawaharlal Institute of Technology, Borawan	Khargone, Madhya Pradesh
<i>B.Tech in Computer Science and Engineering – CGPA: 7.31</i>	<i>Aug 2022 – June 2026</i>
Saraswati Vidya Mandir	Khargone, Madhya Pradesh
<i>Higher Secondary [MPBSE] – Science – Percentage: 81%</i>	<i>2021 – 2022</i>
